ACTION MEMORANDUM AMENDMENT #2

SUBJECT: Request for Increase in Project Ceiling at the Radiation-Standard Products, Sedgwick County, Kansas

FROM: Randy Schademann, On-Scene Coordinator
Planning and Preparedness North Section
Superfund Division

THRU: Mary Peterson, Chief
Planning and Preparedness North Section
Superfund Division

TO: Cecilia Tapia, Director
Superfund Division

2.0

CERCLIS ID#	KSN000705966
Site ID#	A7N1
Category of Removal:	Time Critical
Nationally Significant/Precedent Setting:	No

I. PURPOSE

The purpose of this Action Memorandum Amendment is to request approval for an increase in project ceiling for a fund-lead, time-critical removal action at the Radiation-Standard Products site (Site). The proposed increase in project ceiling is requested as a result of unknown site conditions. Once on-site, the U.S. Environmental Protection Agency (EPA) On-Scene Coordinator (OSC) found radium-226 contaminated soils, bricks, and debris (radium-contaminated material) at depths greater than previously known (up to four feet deep) and in locations not previously identified (under two small sheds at the 920 South St. Francis parcel). The Action Memorandum, approved on July 9, 2009, proposed the removal of radium-contaminated material from the 920 South St Francis parcel and the subsequent storage of the radium-contaminated material on the 650 East Gilbert parcel of the Site. The Action Memorandum Amendment dated July 24, 2009, was developed for a cost ceiling increase to allow for off-site hauling and disposal of radium-contaminated material. Site activities were initiated on July 28, 2009.
